

# Warson & Conway Road Intersection and Warson Road Traffic Study

## PUBLIC COMMENT FORM

In response to resident concerns regarding the Warson Road corridor at the Conway Road intersection and in the vicinity of Ladue High School, the City has hired CBB, the City’s on-call traffic engineering firm, to conduct a traffic study. The study has collected data about the existing traffic conditions and vehicular patterns, evaluated that data and public input, and brought forward several potential solutions for discussion.

An important part of this study is community input. We want to hear from you! In addition to the second public meeting hosted by the City on Thursday, July 18<sup>th</sup> from 5:00 pm to 6:30 pm, we encourage you to ask questions and/or share your opinions regarding the concept alternatives.

Please submit this form to Anne Lamitola, Director of Public Works at City Hall – 9345 Clayton Road, Ladue, MO 63124. You may also send an email to: [alamitola@cityofladue-mo.gov](mailto:alamitola@cityofladue-mo.gov)
